

SA008 CABLE INSTALLATION OVER LV POWER CROSSINGS SPECIFICATION

Introduction

This accreditation aims to give learners knowledge, understanding and basic skills in the cable installation over LV power crossings. It sets out the skills, knowledge and understanding to support the individual to use correct equipment and methods to carry out this task safely.

Purpose

Prepare for further learning or training and/or develop knowledge and/or skills in a subject area

Accreditation

Industry accreditation

Learning Outcomes

- Know relevant health and safety legislation and industry good practice when installing and recovering telecommunications cables crossing above low voltage power lines
- Be able to carry out safe use of equipment and methods for installing telecommunication cables crossing above low voltage power lines
- Be able to work safely when installing or recovering telecommunications cables crossing above low voltage power lines
- Know the emergency and reporting procedures in case of emergency or failure.

Pre- requisite

This accreditation is available to anyone over the age of 16 who is capable of reaching the required standard. There are no barriers that restrict access or progression thereby promoting equal opportunity. It is expected however that learners will have a level of literacy adequate to cope with the assessment.

Expectations at level 2

Achievement reflects ability to select and use relevant knowledge, ideas, skills and procedures to complete well-defined tasks and address straightforward problems. It includes taking responsibility for completing tasks and procedures and exercising autonomy and judgement subject to overall direction or guidance.
