

SA020A MDU AWARENESS

Introduction

This accreditation covers the requirements for working safely in single and multi-occupancy dwellings including buildings in accordance with industry standards and practices. It provides learners with the skills and knowledge of the hazards and potential risks involved working in both single and multiple dwellings safely.

Purpose

Prepare for further learning or training and/or develop knowledge and/or skills in a subject area

Accreditation

Industry accreditation

Learning Outcomes

- Know relevant health and safety legislation and industry good practice when working on site.
- Know how to implement safe site working practices when working to connect fibre cables in or to single and multi-occupancy dwellings including buildings
- Know how to carry out installation of customer optical fibre connection to a single and multi-occupancy dwelling including buildings
- Be able to carry out installation of customer optical fibre connection to a single and multi-occupancy dwelling including buildings

Pre- requisite

This accreditation is available to anyone over the age of 16 who is capable of reaching the required standard. There are no barriers that restrict access or progression thereby promoting equal opportunity. It is expected however that learners will have a level of literacy adequate to cope with the assessment.

Expectations at level 2

Achievement reflects ability to select and use relevant knowledge, ideas, skills and procedures to complete well-defined tasks and address straightforward problems. It includes taking responsibility for completing tasks and procedures and exercising autonomy and judgement subject to overall direction or guidance.
